

We say thank you!

Dear [REDACTED],

Interzum 2023 was a success! It was great to see how our booth was a point of attraction for visitors and what strong interest our product collections NUO and MUTO generated. Also the two exhibited massive table tops with more than 4m length attracted many wood lovers to the booth and served as an impressive photo backdrop for one or the other.

Special thanks go first and foremost to our employees, who actively supported us both in the run-up to the trade fair and during the trade fair itself. Furthermore we would like to thank all visitors, customers, interested parties and suppliers. Your participation and support made this trade show a truly remarkable event. We enjoyed the opportunity to meet you in person, exchange ideas and showcase our latest products and solutions. The positive feedback and your interest have motivated us enormously and shown that we are on the right track.

With best regards

the whole SG team

NUO – an innovative wood textile

Our latest innovation NUO was awarded the Interzum Award "Best of the Best". The astonishment in the eyes of every visitor as we revealed that NUO is made of real wood was our personal highlight. We couldn't be prouder!

Below you will find the information you need about this unique product.

Lumber and solid table tops

Schorn & Groh's wood expertise does not stop at thin wood thicknesses. We have proven this once again at our trade fair booth. A lumber warehouse that has been growing for years houses more than 3,000 m³ of high-quality lumber, decking boards, solid tree slices and spectacular one-piece table tops.

Presentation by Axel Groh – now available digitally

If you want to know which trend topics moved the Interzum this year, you can now view all presentations digitally.

Among them is the exciting presentation by Axel Groh on the subject of sustainable forestry and veneer use.
